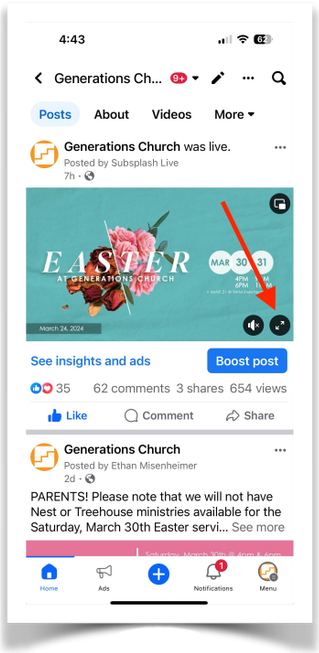
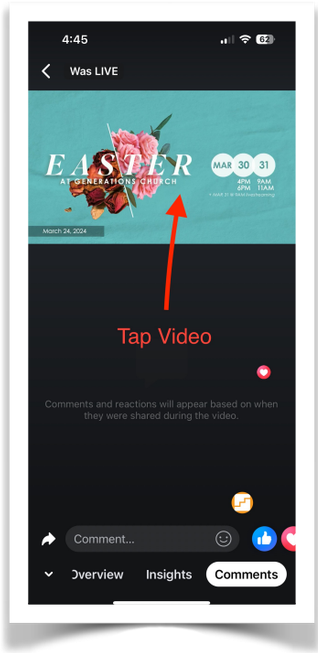
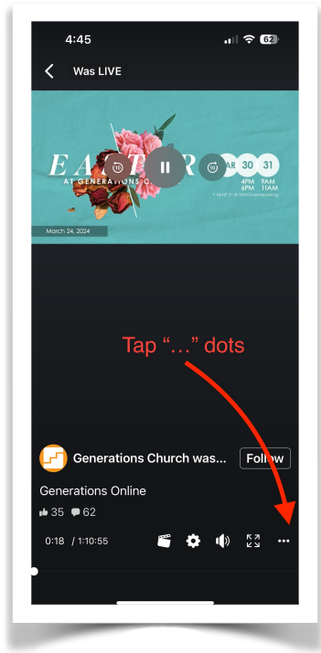
Our streaming setup has changed. The best way to cast directly to your TV is to do so through the Facebook app. In simplest terms: find and tap to open the livestream video on our Facebook page, then tap the video again to reveal the "…" menu at the bottom-right for proper casting options.



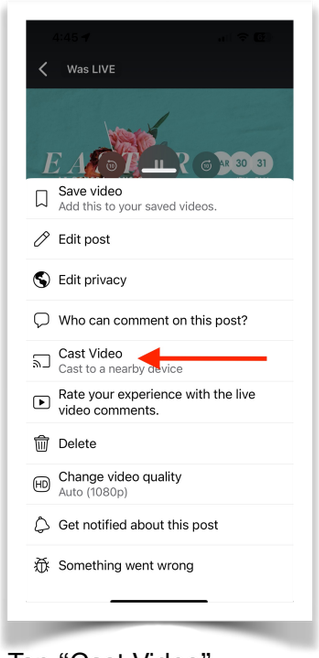
Open the Facebook App & Generations page, expand the video.



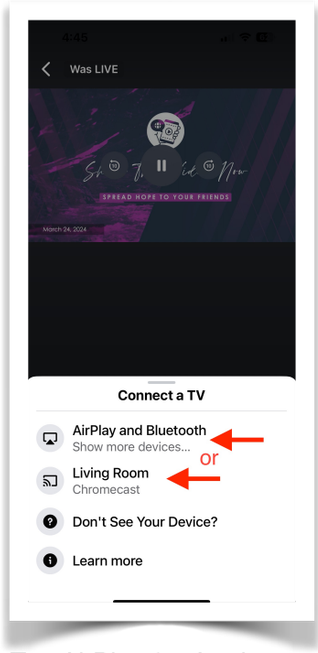
Tap the video itself.



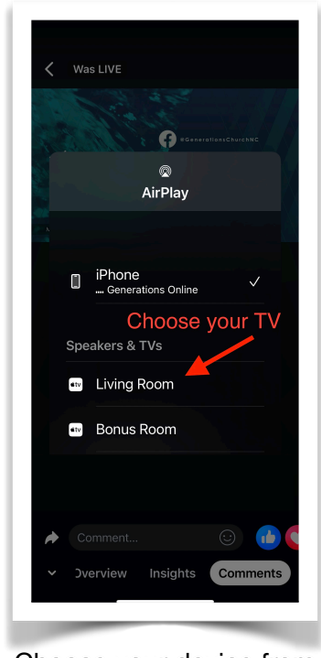
Tap the "…" menu at the bottom right.



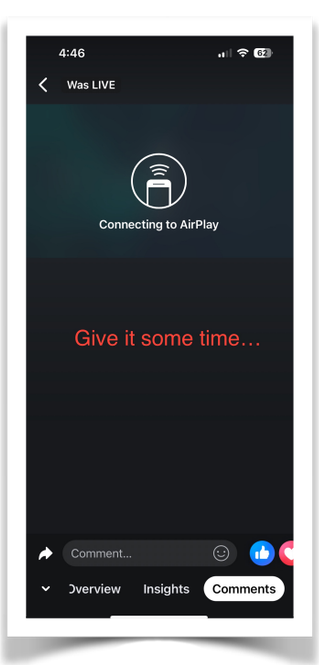
Tap "Cast Video".



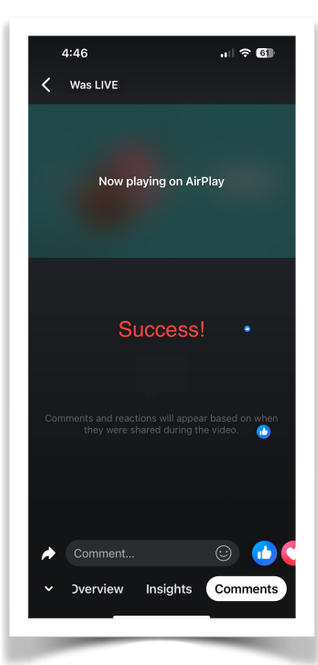
Tap AirPlay for Apple devices or ChromeCast.



Choose your device from the list.



It may take a moment.



You should now see it on your TV.
